

Cultivate Growth. Succeed by Design.

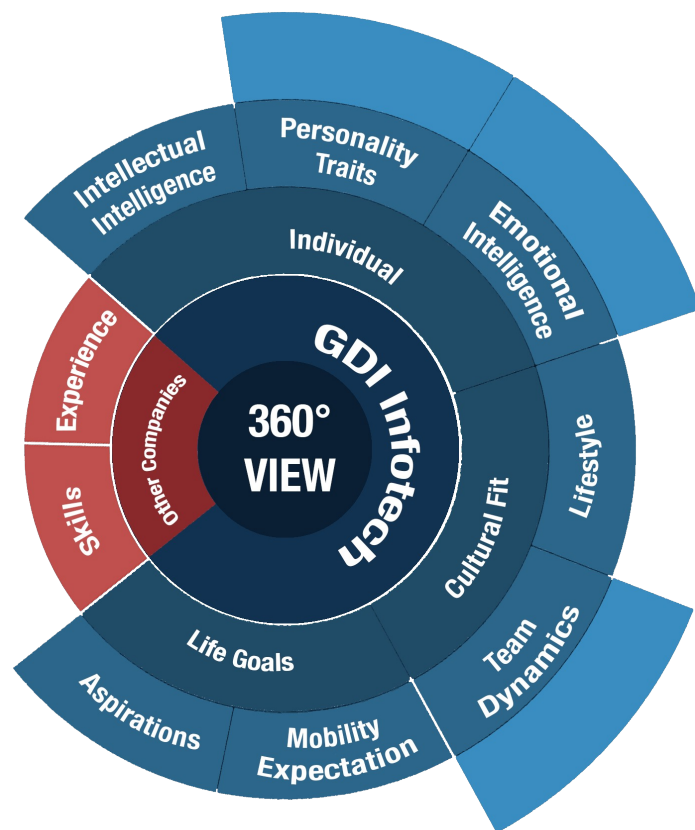

WHO WE ARE

GDI Infotech is a successful and reputable Talent Matchmaking Company focused on talent for all aspects of the software development life cycle. We use our unique 360° View Methodology to avoid false starts and help our clients maintain their growth. Since our founding in 1993, GDI has had a track record of building solutions that stick. When our clients struggled with the adoption of enterprise applications, we built them a more user-friendly software. When our clients battled with limited budgets, we gave them cost-effective alternatives. And when our clients wanted talent to meet their tech needs, we built successful teams. We have found our success by developing deeper relationships with our clients over the past three decades. With a 360° view of clients' needs, we are able to help them grow by putting the right people in the right seats.

WHAT WE OFFER

We are Talent Matchmakers with a deep understanding of the entire software development lifecycle. We invest time to understand the needs and aspirations of companies and take a holistic, 360° view of requirements. This allows us to ensure that our clients consistently have the right people in the right seat. We help our clients avoid false starts so that they can focus on growing their businesses at a desired pace.

We believe that companies are only as strong as the people who work for them. And that's why we pair our clients with a top notch talent to help them move their companies forward.
